– LaCrosse, LaCrosse, WI
Masters Level Studies in World History, Philosophy and Human Relations

Professional Experience

Tompkins Business Development, founded by Keith and Terri Tompkins, consists of three entities building businesses in sales, marketing, service and leadership.

Since 1982 and to the present, Tompkins Business Development has built a national following in the apparel industry, serving customers in retail, souvenir and resort, and business and organization markets. With over 50 million dollars in sales, TBV continues to be instrumental in creating profits, brand identification and promotion through the use of creative and functional apparel. These sales have created and sustained hundreds of jobs to our partners in rural Wisconsin.

Beginning in 2011, TBV expanded into assisted living and long term care for the elderly. We have been involved in developing, financing, recruiting investors, managing operations and have a special focus on marketing in our role as family service advisors to four 60 room assisted living facilities. The facilities aid residents with dementia and Alzheimer's Disease and assist their families in their cares. These businesses provide hundreds of jobs to caregivers and support personnel as we help families with very difficult end of life transitions.

September of 2012 brought another facet to Tompkins Business Development as a vision was fueled to support and promote servant leadership to men in their roles as leaders in their families, businesses and communities. Through monthly lunch meetings featuring inspirational speakers, Leading With Power inspires, teaches and motivates thousands of men in our local community and is expanding to additional locations in the U.S.

Tompkins Business Development operates on a simple vision of providing servant leadership in assisting and building up its clients, meeting their needs and promoting their interests in a principled and balanced family friendly environment.
